SERVICE SMARTS – OIL COALESCING

- ✓ **Preserve your vehicle systems.**
- ✓ **Protect your investment.**
- ✓ **Lower your maintenance costs.**

- EPA regulations in **2007 and 2010** dramatically reduced the allowable diesel engine emissions of nitrogen oxides (Nox) and particulate matter (PM) As a result, major technical advances were developed including: Advanced Exhaust Gas Recirculation (EGR), Selective Catalytic Reduction (SCR), and The Diesel Particulate Filter (DPF)
- **When air contaminated with oil is sent into these systems, you risk considerably shortening its life and possibly spending a great deal to repair it.**
- PuraGuard technology is critical in protecting your investment by preserving the newly developed systems on your vehicle.
