### Patented Wireless Portable Lift System

The wireless lift system family will lift a wide variety of vehicles allowing technicians to safely and efficiently complete preventative maintenance tasks to major component repair.

- 13,500 lb. capacity fleet models
- 18,500 lb. capacity heavy commercial models
- 18,500 lb. capacity wide military models

### Wheel Lift Systems

100% air operated mid-rise lift family provide a shop with unsurpassed flexibility and quick access to major components on all types of vehicles. The wheel lift system takes all the guess work out of safely lifting any vehicle while the positive pinning system provides safe and clear access under one end of the vehicle.
